SADAH VPN is a handy and reliable application designed to enable you to unblock websites and to secure connections. A virtual private network (VPN) is a method of computer networking--typically using the public internet--that allows users to share information privately between remote locations, or between a remote location and a business' home network. A VPN can provide secure information transport by authenticating users, and encrypting data to prevent unauthorized persons from reading the information transmitted. The VPN can be used to send any kind of network traffic securely.
