The program, which protects your PC from spyware and viruses, includes a free web.Q: Measurability and measure homomorphisms If X and Y are T_1 topological spaces, and P and Q are σ -algebras on X and Y respectively, does there exist a measurable σ -algebra M on $X \times Y$ such that $P \otimes Q$ is a sub- σ -algebra of M ? A: Yes, but not necessarily in the product topology. There are measurability (Borel) constructions that work, but if you want a general topological one then the answer is no. If X, Y are first-countable Hausdorff, there is a natural Hausdorff topology that is determined by the convergent nets: you take as a basic open set the set of convergent nets.

This is the so-called F_σ topology. It is a product topology, but not a product σ -algebra; if P, Q are σ -algebras of subsets of X, Y , then $P \otimes Q$ is
