Get the latest Stutter free video player and other programs for Windows,Mac OS,and Linux. The software is compatible with Windows operating systems ranging from.Q: Select Statement in T-SQL i have a problem in writing a select statement, i have three table student(id_student,name), matric(id_matric,id_student,age,sex), Marks(id_student,subject,mark). and a table containing the student details I need to display the student details whose age = 21' Change it to: WHERE s.id_student = m.id_student AND m.age = 21' But this doesn't make sense, because the WHERE clause is meant to be filtering the results of the query. So your WHERE clause should always be AND m.age
