[Folder] java java EDIT: Followed the advice to correct packages, as well as following the instruction to fix the available packages. See the picture below. A: You deleted a package from the repository list, for example skype: In the Server Manager, click on the Add Roles button at the top of the page, then click on the File Services role to add it back. or A: If you don't want to lose any data you might want to create a new user with the most privileges on the server. You can use the Local Administrator account that would act as a guest account, or you can use a local user account with the same privileges of the Local Administrator. The Local Administrator has the full rights to the server computer, you only need to set some settings in the Server Manager properties window. Example of a new user : If you open a command window on the server you can add a new user by doing this : `net user [username] [password]` New user : example : Username = myusername Password = mypassword After you have created the new user you will need to set the local administrator username and password in the Server Manager : Servers > Local Computer > Right Click > Properties Second way : Because I only have a computer where I develop I often create a local user account on the server so I can connect to the server using a terminal window and run commands directly instead of using the console from another computer. Tutorial : How to create a Local Administrator account? Making local administrator account in Windows Server 2008 R2 2010-11 Minnesota-Duluth Bulldogs women's ice hockey season The Minnesota-Duluth Bulldogs in the 2010-11 NCAA Division I women's ice hockey season are coached by Don Lucia and governed by the University of Minnesota Duluth Athletic Department.
